

Sales Analysis and Forecasting Project Report

Objective

To contribute to business success by applying data analysis and time series forecasting techniques to generate insights and predict future sales.

Project Description

- 1 Created interactive dashboard with KPIs and filters
- 2 Performed data analysis using charts and visuals
- 3 Applied time series for 15-day sales forecasting
- 4 Generated actionable business insights

Data Cleaning

- 1 Removed extra columns
- 2 Fixed data types
- 3 Handled null and missing values
- 4 Replaced #N/A with 0

DAX Calculations

- 1 Average Delivery Days
- 2 Created new table
- 3 Sales Forecast using order date

Project Insights

- 1 COD preferred by customers
- 2 West region has highest sales
- 3 Standard class shipping most used
- 4 Nov 2019 and Dec 2020 highest sales
- 5 Mar 2020 and Dec 2019 highest profit

Recommendations

- 1 Promote COD
- 2 Expand strong regions
- 3 Optimize shipping
- 4 Plan based on peak months
- 5 Use forecasting for planning
